

Detailed program Tuesday - March 16

Time	.NET	Java	IBMi	Testing	Development Process & Methodology	Mobile Solutions	Agile in the organisation	Three screens and the cloud	Successful Delivery of Agile Solutions	Conversation Corner	
09:00 - 09:10	Introduction by Thomas Zetterberg										
09:10 - 10:00	Michael Feathers Reinventing Software Design										
10:30 - 11:20	Anders Bratland Refactoring - Glänsande cromelister eller en solid grund?	Matthew McCullough Open Source Debugging Tools for Java	Mike Cain What's New in DB2 for i?	Henrik Andersson Är det en bugg, en CR eller ett förbättringsförslag?	Neal Ford How Agility Allows Us to Build One of the World's Biggest Rails App	Erik Lundh Making Sense of Lean and Agile with Getting Things Done (GTD)	Marcus Ahnve TDD and Android	Bjarte Bogsnes Beyond Budgeting	Allan Knudsen Three screens and the cloud	Alan Brown We face the same challenges as you do!	Emily Bache Should a professional developer always use TDD?
11:40 - 12:30	Keith Brown Single Sign On for ASP.NET Web Applications	Neal Ford Construction Techniques for Domain Specific Languages	Mike Cain SQL Programming DB2 for i SQL OLAP Functions	Henrik Andersson Introducing Exploratory Testing Champions	Brian Marick Artisanal Retro-Futurism	Humayun Rashid Design Thinking as a Development Process & Methodology	Adrian Kosmaczewski Integrating iPhone Applications with Backend REST Services	Agneta Jacobson Closing the Gap Between Business & IT	Christofer Löf Architecting the cloud	Alan Brown How do you plan and manage an agile development project?	
12:30 - 13:30	LUNCH										
13:30 - 14:20	Roy Oshero Introduction to TDD in .NET	Adam Bien Lightweight Killer Apps with Nothing But Vanilla Java EE 6	Niels Peter Sørensen No nonsense ILE RPG on the web	Emily Bache Agile Testing Strategy	Bill Wake To Make a Long Story Short: Splitting User Stories	Neal Ford Emergent Design	Marko Gargenta-Marakana Android for Java Developers	Thomas Nilsson Taxing, Climbing and Crusing Agile Teams	Kristofer Lijebblad Windows Azure AppFabric	Robin Bater Agile Requirements Best Practices	Matthew McCullough and Tim Berglund The Dire Need for Encryption in Webapps
14:40 - 15:30	Alan Smith Declarative WCF/WF Services in .NET 4.0	Maurice Naftalin Performance Tuning with Cheap Drink and Poor Tools	Mats Lidström Power I, modern ILE RPG and PHP - the obvious choice for our new application!	Geoff Bache Text-based Acceptance Testing with TextTest	Chris Hedgate Effective retrospectives - the key to an effective team	Ola Ellnestam Phronetic Leadership - how to lead knowledge creating companies	Adrian Kosmaczewski Introduction to iPhone development	David Harvey How many Agile coaches does it take to change an organisation?*	Dag König Introduktion till Silverlight4	Jean-Yves Rigolet Agility@Scale in practice	Thomas Nilsson and Humayun Rashid and Rik Arends In conversation
15:30 - 16:00	BREAK										
16:00 - 16:50	Udi Dahan Intentions & Interfaces - Making Patterns Concrete	Angelika Langer Java Programming in a Multicore World	George Farr Rational Application development tools strategy and latest announcements for IBM Power.	Engin Yorgancioglu and Volkan Sevinco Data-Driven Transaction Based Unit Tests	Steven List Facilitation Patterns and Antipatterns	Roy Oshero Beautiful teams and leaders	Johan Sanneblad How to successfully deliver large iPhone projects on time and within budget	Arne Ahlander Product Owner - a Collaborative Role	Robert Folkesson Designer Workflow	Annika Kortell Agile development relies on agile test	Emily Bache Developers have too many responsibilities: analysis, design, coding, testing...
17:10 - 18:00	Mathias Olausson Testing, testing. A first-look at the new testing capabilities in Visual Studio 2010	Andrew Lombardi Rapid Application Development with Apache Wicket	George Farr Rational Power tools latest announcements, the details	Bill Wake Storytesting	Niclas Nilsson and Hans Brattberg The Pair Programming Show	Chris Hedgate One for all, all for one - Why working together is more efficient	Paul Rayner Developing iPhone applications in .NET	Tom Stenström Agile systems for agile business - agile business with agile systems (?)	Fredrik Normén Building RIA with Silverlight and WCR RIA Services	Peter Eeles Agile, not Anarchy	
18:00 - 20:00	The city of Goteborg invites you to mingle at SDC2010.										

Detailed program Wednesday - March 17

Time	.NET	Java	WEB	Testing	Development Process & Methodology	Emerging Technologies/Cloud Computing	Agile in the organisation	Conversation Corner	
09:00 - 09:10	Introduction by Thomas Zetterberg								
09:10 - 10:00	Diana Larsen How you can manage new organizations in the old way?								
10:30 - 11:20	Tiberiu Covaci Patterns for Parallel Programming	Jevgeni Kabanov Do you really get class loaders?	Douglas Crockford The Future of JavaScript. I mean ECMAScript.	Brian Marick I think I finally understand MOCKS	Jimmy Nilsson Experience of years agile coaching	Henrik Kniberg Kanban and Scrum - making the most of both	Jonas Bonér Let it crash: using Actors for fault-tolerance, scalability and concurrency	Joakim Sundén Drinking from the source - A report from a lean enthusiast's pilgrimage to Toyota	
11:40 - 12:30	Magnus Härlin Design For Testability	Ben Hale Modular Web Applications with OSGi	Nathaniel Schutta Ajax Library Smack down: Prototype vs. jQuery	Geoff Bache Making GUI testing productive and agile	Marcus Widerberg and Chris Hedgate Individuals and interactions, how hard can it be?	Diana Larsen Creating a Climate for Project Team Success.	Marcus Ahnve Distributed Version Control Systems	Jurgen Appelo Checklist for the Agile Manager	Emily Bache Which agile method is best for my project?
12:30 - 13:30	LUNCH								
13:30 - 14:20	Don Syme F# for Parallel and Asynchronous Computing	Rikard Thulin Building software using Rich Clients Platforms (Eclipse RCP/NetBeans RCP)	Thomas Lundström BDD in Web Development	Johan Jonasson Introducing Exploratory Testing into the organization	Yves Hanoulle Tips for creating a self-organizing team	Joakim Sundén Flow where you can, pull where you must - a practitioners guide to Kanban	Tim Berglund Managing Grails with JMX	Marcus Ahnve Taylorism and Mass Production - Why The Software Factory Fails	Emily Bache Do agile teams need a coach or a leader or a manager?
14:40 - 15:30	Jimmy Nilsson Entity Framework + Domain-Driven Design = true?	Andrew Lombardi Google App Engine Java Applications HOWTO	Rik Arends Introducing Ajax.org Platform and how to build collaborative applications	Erik Lundh Two helpful TDD thought patterns - A Russian Doll - Full of Clockworks	Rickard Eriksson Lean Software Development och Scrum i symbios	Brian Marick Seven Years Later: What the Agile Manifesto Left Out	Pär Sikö and Martin Gunnarsson Making data look good using Java, JavaFX and Groovy	Andrea Provaglio Systemic Software Development for Agile Teams	
15:30 - 16:00	BREAK								
16:00 - 16:50	Scott Allen Guiding Principles for an ASP.NET MVC Application	Martin Gunnarsson and Pär Sikö JavaFX Designer - Developer Workflow	Nathaniel Schutta Making Web Apps Suck Less	Morgan Persson Exekverbara krav med Nbehave	Anna Herting Kanban - Vägen till struktur i det oförutsägbara	Nick Oostvogels The A-Team as agile pioneers	Thomas Lundström Ruby for C#-ers	Kent Beck G Forces in the Organization	Magnus Härlin In Conversation
